PROJECTS

Shopping Cart (2020)

An online shopping cart developed using PHP for backend, Angular for frontend and MongoDB database with functionalities like adding or deleting a product, increase the quantity of a product and display the total price.

Photo App (2020)

A web page made using PHP, CSS, HTML, MySQL, Javascript with functionalities like uploading photos, hitting the like button, commenting on photos and more.

EESTEC Olympics website (2019)

I worked together with the IT department from EESTEC on our event site. During this project I developed skills in using Node.js, Vue.js and especially Git for working in a big team like this.

Devhacks (2018 + 2019)

With a team of 3 friends, I participated at two editions of Devhacks, a 24 hours hackathon. The first edition was based on Financial Technology and the second one on Social Impact.
